Dear Reader,

Becky is a very curious baby robin and the day that she learns how to fly, she discovers a very mysterious seed. Upon gobbling up the seed, her feathers pop out of her like tiny rockets!

With the aid of her parents, Becky must now go on a quest to find the antidote that will re-grow her once beautiful feathers, but because she cannot fly, the way is fraught with danger.

At the end of her quest, she not only discovers the magical antidote, but also meets a handsome friend who helps her learn how to use her new wings.

IN SEARCH OF A SEED is an engaging adventure geared towards younger children.

Sincerely,
Eryn Edelen
